under the guidance of faculties Dr. Manjunath. K, Mrs. Akshatha and Miss. Swathi.

2. A special lecture was organized to understand the process involved in the structure and working of the water purification plant.
3. Students got an excellent benefit by visiting the biggest water purification plant in this area with and understand about the purification methods.
4. Water treatment is whereby the used water or raw water from the river is treated in process to make the water more acceptable for a desired end-used. The goal of water treatment is to remove existing contaminants in the water, or reduce the concentration of such contaminants so the water becomes fit for its desired end-used. The process involved in treating water is solids separation using physical process and chemical process.
5. Before the water is distributed into the public houses, the water has to undergo the water treatment process such as follows:

Dr. Manjunath. K proposed vote of thanks.

Feedback:

All the faculties expressed their gratitude to Principal and HOD department of Zoology for the permission.

Future Perspectives: The IQAC is looking forward to organize seminars/conference/workshop with respect to multidisciplinary area.

Report Submitted by: Dr. Manjunath. K

Designation: Assistant Professor
