#### POLICY DOCUMENT FOR WATER CONSERVATION

Water is most precious natural resources that needs to be conserved for future generation. Therefore we at our institution have framed a policy to harvest rain water during rainy season. Water collected on the roof top is channelized open well existing in the campus.

Water Conservation includes all the polices, strategies and activities to sustainably manage the natural resources of fresh water, to protect the hydrosphere, and meet the current and future human demand.

Bore well and open well are in existence since a decade and their maintenance is taken care of in the institution.

The water distribution system in the campus is done through pipeline that connects strategic areas on the campus and taps have been installed in places like garden area, restrooms, library, quarters etc.

#### GREEN CAMPUS POLICY DOCUMENT

Maintaining greenery on the campus is essential as it creates a conducive atmosphere for learning and creates positive attitude among the students.

The institution's Green Campus policy emphasizes on plantation, Maintenance of lawns and Gardening.

To restrict the entry of vehicles on every Wednesday to reduce the carbon emission on the campus to be supported by the foliage f trees.

Pedestrian friendly pathways ensure the movement of staff and students in a disciplined manner and prevent the crowd.

Keeping in view with the government policy the institution imposes a ban on the use of plastics in the campus.

Observing world Environment Day regularly by planting saplings and nurturing the existing plants leading to a beautiful landscape with trees and plants .
